

FIG. 1 is a perspective view of a sign assembly in accordance with the present invention. The sign assembly includes a sign 10, a support structure 12, and a mounting bracket 14. The sign 10 is a rectangular plate with the word "Sign" written on it. The support structure 12 is a horizontal bar that supports the sign 10. The mounting bracket 14 is a U-shaped bracket that is used to mount the support structure 12 to a wall. The sign 10 is mounted to the support structure 12 by means of two screws 16. The support structure 12 is mounted to the wall by means of the mounting bracket 14. The mounting bracket 14 is made of a material that is strong enough to support the weight of the sign 10. The sign 10 is made of a material that is durable and weather-resistant. The support structure 12 is made of a material that is strong enough to support the weight of the sign 10. The mounting bracket 14 is made of a material that is strong enough to support the weight of the sign 10.

FIG. 1(a)
